Data Source: Behavioral Risk Factor Surveillance System

Data is based on the percent of adults who were told by a doctor or other health care professional that they had high blood pressure.

% = Weighted percentage of respondents

LCL= Lower 95% confidence level of the weighted percentage

UCL= Upper 95% confidence level of the weighted percentage

All percentages are weighted to be more representative of the population of Maine and to adjust for non-response.

DNR = data not reliable. Data is suppressed if confidence intervals are greater than 20 percentage points.
